## CWM-854 –Wireless-G miniPCI Module

The CNet Smart Wireless-G miniPCI Module installs in most built-in system and lets you put your computer almost anywhere in the building, without the cost and hassle of running network cables. Now you don't have to drill holes in your walls and climb through the attic or cellar to get connected to the network. Once you're connected, you can keep in touch with your e-mail, access the Internet, use instant messaging to chat with friends, and share files and other resources such as printers and network storage with other computers on the network.

The CNet Smart Wireless-G miniPCI module connects you with Wireless-G networks at an incredible 54Mbps! And for added versatility, CNet CWM-854 is also capable of inter-operating with all the Wireless-B products found in homes, businesses, and public wireless hotspots around the country.

CNet also provides a family of wired and wireless LAN products that deliver the same level of security, scalability, and manageability for WLANs that customers have come to expect in their wired LAN, including routers, switches and hubs, Broadband modems, and network adapters.

## KEY FEATURES

- Investment Protection: 5 times faster and interoperate with existing Wireless-B equipment seamlessly
- Wireless Security: up to 128-bit WEP and 256-bit WPA
- Maximum Operation Range: Up to 350 meters
